Lawhon & Associates, Inc. (L&A) provides full-service environmental and engineering consulting services to the public and private sector. The company was founded in 1985 and attributes its success to providing responsive, client-focused technical expertise through the personal direction of the principals and senior staff. Headquartered in Columbus, L&A also has offices in Cleveland, Dayton and Cincinnati, Ohio.

We understand dealing with environmental challenges can divert time and resources away from your core mission. L&A’s engineers and scientists possess the knowledge and experience to identify potential environmental liabilities and prioritize needs and response actions that meet project and stakeholder objectives. Our clients can depend on us to provide accurate, practical and cost-effective solutions—backed by technical credentials and professional certifications relevant to the services we provide.

L&A is a women-owned, small business and a licensed engineering company in the State of Ohio. The firm maintains numerous local and state government DBE certifications.

The Ohio Department of Transportation (ODOT) Construction and Materials Specifications (CMS) Manual requires that, with exception to those used for parking, all areas outside the project construction limits be reviewed to evaluate potential impacts to cultural and ecological resources, public lands, FEMA 100-year floodplain and hazardous waste materials. The selected contractor is required to contract with an environmental consultant pre-qualified by ODOT for each environmental resource to be evaluated.

Section 105.16 “...Have the proposed borrow and waste areas reviewed by an environmental consultant that is pre-qualified by the Department for ecological work.”

Section 107.10 “...All properties to be utilized by the Contractor outside the project Right-of-Way must be cleared for all environmental resource impacts prior to the beginning of work.”

Lawhon & Associates, Inc. (L&A) is prequalified by ODOT in all twelve environmental categories. To date, we have assisted contractors in meeting the above requirements on more than 50 projects across the state ranging from a simple slide repair to major highway reconstruction. With in-house personnel in every environmental discipline, including Asbestos Hazard Evaluation Specialsts, we are also able to provide assessment, monitoring or permitting services that may be required during the construction phase of a project.

WE OFFER:
- Responsive, client-focused technical expertise with attention to detail
- Value-oriented, practical solutions to avoid or manage environmental concerns
- Qualified staff with professional certifications relevant to required services
- Established relationships with local and state agencies
